

Abdul Qadir Software Engineer

📍 Lahore, Pakistan ✉️ abdulqadir12e@gmail.com ☎️ +92 313 7963948 🔗 [abqadir-dev](#) 🔄 [abqadir-dev](#)

Profile

Senior Software Engineer with 5+ years of experience building scalable full-stack, web, mobile, and AI-powered applications. Skilled in React, Next.js, Node.js, TypeScript, Python, and AWS cloud architectures. Experienced in LLM integrations, APIs, automation workflows, and real-time systems to build high-performance user-centric products. Developing and optimizing SaaS platforms with strong focus on scalability and performance.

Skills

- | | | | |
|----------------|--------------------|------------|------------------|
| • TypeScript | • React.js | • Next.js | • TailwindCSS |
| • Nest.js | • Express.js | • REST API | • PostgreSQL |
| • Python | • FastAPI | • GraphQL | • Microservices |
| • React Native | • Redux Toolkit | • AWS | • Docker |
| • CI/CD | • LLM Integrations | • RAG | • App Deployment |

Professional Experience

Apr 2025 – Jul 2026 Lahore, Pakistan	Senior Software Engineer Ubiquify Digital Tech Stack: Next.js, Nest.js, Node.js, PostgreSQL, AWS, Docker, CI/CD, N8N - Led development of SaaS platforms, improving automation, scalability, and delivery speed across client projects. - Developed the CNTNDR Fitness Platform, a multi-tenant SaaS application using NestJS and Next.js, improving onboarding through tenant isolation and automated provisioning. - Implemented a trainer CMS with video streaming, e-commerce functionality, and program management features, enhancing user engagement and monetization. - Architected scalable infrastructure using AWS (EC2, RDS, S3) with Docker and CI/CD pipelines, ensuring high availability and performance across applications. - Built the SEO Agent Platform, an AI-powered content automation and SEO optimization system using React, Node.js, PostgreSQL, and Anthropic Claude APIs, significantly improving content generation throughput. - Designed and implemented an intelligent 12-step SEO workflow engine using N8N, automating keyword research, SERP analysis, content planning, AI content generation, and publishing workflows. - Integrated Google Search Console, external SEO data sources, and real-time notifications (email, Slack, in-app) to provide actionable SEO insights, workflow monitoring, and performance tracking. - Engineered the RFQ Manager, a MERN Stack platform for automated quotation workflows, reducing quote turnaround time through CSV imports, RBAC, and email automation.
Jan 2024 – Feb 2025 Lahore, Pakistan	Software Engineer Techdots Tech Stack: React, Next.js, FastAPI, Express.js, GraphQL, MongoDB, WebSockets - Delivered solutions across e-commerce, real estate, healthcare and fitness, improving scalability, automation, and user engagement. - Led backend data engineering for Skipify, a large-scale property intelligence platform processing 120M+ records, achieving high data consistency using AWS S3, MongoDB, and Solr.

- Built **LinkedGolf**, a real-time event scheduling and booking platform with live availability tracking, **Google Maps** integration, and automated cron jobs, significantly reducing administrative effort.
- Developed **Aniflex**, a personalized fitness platform generating dynamic 30-day workout plans and health metrics, improving user retention.
- Engineered a secure **Healthcare Portal** using **FastAPI**, **React**, and **WebSockets**, enabling real-time doctor-patient communication with encrypted data storage.
- Built **Nivoda**, a real-time shipment tracking and quality control platform using **React**, **GraphQL**, and **Express.js**, reducing manual tracking effort.
- Developed **Makhulu**, a real estate CRM integrating **PropertyFinder**, lead management, and analytics, improving lead conversion.
- Modernized the **Cashyou CMS** by migrating from **Ruby on Rails** to **FastAPI** and **PostgreSQL**, improving system scalability, maintainability, and performance.
- Designed and optimized background job processing, notification systems, caching strategies, and asynchronous workflows to enhance platform performance and stability.
- Established **CI/CD** pipelines, automated testing, code review standards, and deployment processes, accelerating release cycles and improving code quality.

Sep 2020 – Jan 2024
Lahore, Pakistan

Software Engineer

Retailo Technologies

Tech Stack: React Native, Node.js, Nest.js, MySQL, AWS SQS, REST APIs, Sentry

- Developed scalable retail and warehouse platforms supporting multi-country operations across Saudi Arabia, UAE, and Pakistan, serving millions of merchants and warehouse operations.
- Architected the **Warehouse Management System (WMS)** handling inventory management, purchase orders, stock movements, and multi-location workflows, improving inventory accuracy and warehouse efficiency.
- Built **StockFlo**, a mobile warehouse application enabling real-time inventory tracking, order picking, stock transfers, and delivery updates, improving warehouse productivity.
- Engineered the **Retailo B2B Ordering App**, a high-performance **React Native** application with multilingual support, enhancing user experience and accessibility across multiple regions.
- Designed and developed backend services and **RESTful APIs** using **Node.js**, **NestJS**, and **MySQL** to support large-scale data processing, order management, and asynchronous business workflows.
- Implemented background jobs, event-driven processes using **AWS SQS**, and notification systems to improve system reliability, scalability, and operational automation.
- Maintained high code quality through automated testing, application monitoring (**Sentry**), code reviews, and **CI/CD** pipelines, ensuring stable releases and rapid development cycles.

Education

2016 – 2020
Rawalpindi, Pakistan

BS in Computer Science
PMAS Arid Agriculture University
CGPA: 3.60
