

Abdul Qadir Software Engineer

📍 Lahore, Pakistan ✉️ abdulqadir12e@gmail.com ☎️ +92 313 7963948 🔗 [abqadir-dev](#) 🔄 [abqadir-dev](#)

Profile

Software Engineer with 4+ years of experience building scalable web, mobile, and AI-powered applications. Experienced in designing and developing large-scale SaaS platforms, cross-platform applications, real-time systems, and distributed architectures. Strong background in system architecture, database design and optimization, cloud infrastructure, LLM integrations, and workflow automation, with a focus on building reliable, high-performance, and scalable software.

Skills

- | | | | |
|----------------------|--------------------|----------------|-----------------|
| • JavaScript | • React.js | • Next.js | • React Native |
| • Nest.js | • Express.js | • PostgreSQL | • MongoDB |
| • Python | • FastAPI | • REST APIs | • Microservices |
| • React Query | • Redux Toolkit | • Tailwind CSS | • Zustand |
| • GraphQL | • AWS | • Docker | • CI/CD |
| • Prompt Engineering | • LLM Integrations | • RAG | • N8N |

Professional Experience

Apr 2025 – Jul 2026 **Senior Software Engineer**
Lahore, Pakistan Ubiquify Digital

- Tech Stack:** Next.js, Nest.js, Express.js, PostgreSQL, MongoDB, Redis, AWS, Docker, CI/CD, n8n, Anthropic APIs
- **CNTNDR Fitness Platform:** Developed a **multi-tenant fitness** SaaS platform that enables trainers to launch and manage their own branded websites, clients, workout programs, video content, subscriptions, and payments.
 - Designed the **tenant architecture** and full-stack application using Nest.js, Next.js, PostgreSQL, and Redis, supporting tenant-specific data and application configuration.
 - Built the **trainer CMS** and core business workflows for content management, workout programs, video streaming, e-commerce, and client management, with deployments managed through AWS, Docker, and CI/CD.
 - **SEO Agent Platform:** Built an AI-powered SEO and **content automation** platform that automates keyword research, SERP analysis, content planning, AI content generation, and optimization.
 - Designed workflow **automation** using **n8n**, integrating **LLMs** through Anthropic APIs to generate and process content across multiple stages of the SEO workflow.
 - Developed backend services and data workflows using Express.js and MongoDB, with integrations for **real-time notifications** across email, Slack, and in-app channels.
 - Improved content generation throughput by 60% by automating research and content generation.
 - **RFQ Manager:** Built a CRM and **quotation management** platform for a global hardware e-commerce business, centralizing products, customers, quotations, and customer communication.
 - Developed RFQ workflows, CSV imports, RBAC, **email integration**, analytics dashboards, and real-time notifications to support quotation processing and customer management.

Jan 2024 – Mar 2025
Lahore, Pakistan

Software Engineer Techdots

Tech Stack: React.js, Next.js, Express.js, React Native, MongoDB, PostgreSQL, FastAPI, GraphQL, WebSockets, AWS

- **Healthcare Portal:** Developed a healthcare platform using **Next.js**, **Nest.js**, and WebSockets, implementing appointment management, file uploads, real-time messaging, and secure authentication.
- **Aniflex:** Developed a fitness app using **React Native**, generating dynamic 30-day workout plans, tracking user progress, and managing subscription-based features.
- **LinkedGolf:** Built a golf app using **React Native**, creating a real-time event scheduling and booking platform with live availability, Google Maps, cron jobs, and automated notifications.
- **Nivoda:** Developed **shipment tracking** and quality control features using React.js, GraphQL, and Express.js, providing real-time shipment visibility and operational workflows.
- **Makhulu:** Customized **TwentyCRM** with lead management, PropertyFinder integration, activity tracking, reporting dashboards, and workflow automation.
- **Cashyou:** Modernized the **CMS** by migrating legacy modules from **Ruby on Rails** to FastAPI and PostgreSQL, while also optimizing SQL queries, database indexes, and API performance.
- Implemented **background jobs**, **caching**, **email notifications**, and asynchronous processing across applications to support business workflows and reduce repetitive manual operations.
- Worked across **API development**, **database optimization**, real-time communication, monitoring, and **CI/CD**, contributing to application performance, reliability, and production releases.

Sep 2020 – Jan 2023
Lahore, Pakistan

Software Engineer Retailo Technologies

Tech Stack: React Native, Node.js, Nest.js, MySQL, Amazon SQS, AWS, REST APIs, Sentry, CI/CD

- **Warehouse Management System (WMS):** Architected and developed core warehouse workflows for inventory management, purchase orders, stock movements, returns, and multi-location operations across Saudi Arabia, UAE, and Pakistan.
- Built **StockFlo**, a React Native warehouse application for real-time inventory tracking, order picking, stock transfers, and delivery updates, supporting day-to-day warehouse operations.
- Designed backend services and **REST APIs** using Node.js, Nest.js, and MySQL, supporting inventory, ordering, and asynchronous business workflows across the platform.
- **Retailo B2B Ordering App:** Developed a React Native mobile application for B2B ordering, supporting multilingual experiences across multiple markets.
- Implemented backend workflows, background jobs, and **event-driven** processing using **Amazon SQS**, handling asynchronous operations and application notifications.
- Developed and maintained **retail** and **warehouse** systems serving **millions of merchants** across Saudi Arabia, UAE, and Pakistan, working across both customer facing applications and internal operational platforms.

Education

2016 – 2020
Rawalpindi, Pakistan

BS in Computer Science
PMAS Arid Agriculture University
CGPA: 3.60
